

What does the Human Future Look Like?

An Evolution Biologist and Futurist brings good news!

Crisis is Opportunity: The Evolution of Humanity from Competition to Cooperation Living Better on a Hotter Planet

Our scientific models of nature have become our cultural creation stories, telling us through physics that we live in an accidental, non-living universe in entropic decline and through biology that we are doomed to an endless Darwinian struggle in scarcity. Evolution biologist and futurist Dr. Elisabet Sahtouris helps us discover instead an updated scientific model of nature as a living, self-organizing universe in dynamic balance and an evolutionary process in which hostile competition gives way to mature collaboration—a view that encourages people everywhere to express their unique talents through contributions to peaceful cooperation, both local and global. In this view it is clear that the globalisation of humanity is a natural, biological, evolutionary process away from exploitation and toward global family. Revealing Nature's own secrets of success permits us to see clearly how to overcome current obstacles to achieving these ends, thus showing the way to a possible future in which humanity and other species thrive in cooperative ecological sustainability despite severe climate changes.

Dr. Sahtouris' lectures & workshops include breathtakingly beautiful slide shows

Dr. Elisabet Sahtouris is an internationally known evolution biologist, futurist, author, business consultant and speaker. Citizen of the USA and Greece, she lives in Spain, where she works with [Mallorca Goes Green](#) toward sustainable local economy. Fellow of the World Business Academy and member of the World Wisdom Council, her post-doctoral fellowship tenure was at the American Museum of Natural History in New York; she taught at MIT and the University of Massachusetts, was a UN Consultant on indigenous peoples, a science writer for the NOVA-HORIZON TV series, taught in a sustainable business MBA program and organized the Hokkaido Foundations of Science Symposium in 2008 and another in Kuala Lumpur in 2009. Her books include *EarthDance: Living Systems in Evolution*, *A Walk Through Time: from Stardust to Us* and *Biology Revisioned*, w. Willis Harman.

Dr. Sahtouris ever updates her model for a living universe integrating physics, biology and spirituality. She sees solutions to our social and economic crises in the evolution of Earth's ecosystems and works passionately for the health and well-being of our global family.

Her venues have included top government agencies in Australia, New Zealand, Brasil and the Netherlands, The World Bank, UN, UNESCO, EPA, Digital Earth Society, Boeing, Siemens, Tokyo Dome Stadium, Sao Paulo's leading business schools, State of the World Forums (NY & San Francisco), First Rand Bank Group S.Africa, World Parliament of Religions, and many more.
